Comprehension Alert: You are about to purchase a product that is not simple and may be difficult to understand

What is this product?

Type: The Fund is a sub-fund of GemCap Investment Funds (Ireland) plc, which is an umbrella type open-ended investment company with variable capital and segregated liability between sub-funds and is incorporated with limited liability under the laws of Ireland with registered number 485081, which was authorised by the Central Bank on 11 November 2010 as a UCITS.

As detailed in the "Switching" section of the Prospectus, Shareholders can switch between Funds and different classes within the same Fund. Subject to minimum investment and holding requirements of the relevant Class, Shareholders may convert some or all of their Shares in one Fund to Shares in another Fund or another Class in the same Fund.

The Fund is considered to be actively managed in reference to the Solactive United Kingdom Large Cap EX Investment Trust Index NTR, the Solactive US Large Cap Index and the Solactive Euro 50 Net Total Return Index (the "Benchmarks") by virtue of the fact that the Benchmarks are used for performance comparison purposes and the Solactive Euro 50 Net Total Return Index is used as the reference index for the purposes of calculating the global exposure of the Fund using the Relative VaR methodology. However the Benchmarks are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmarks. The Fund is suitable for investors who are looking for a high probability of capital growth over the medium to long term, but who are able to withstand medium to higher risks, due to the market sensitivity and potentially volatile nature of the underlying investments.

The Fund aims to meet its objective via exposure to a diversified portfolio of defined return investments linked to global equity indices. It will invest primarily in a mixture of Transferable Securities (corporate bonds and government bonds rated at least BBB- by Standard and Poors at outset), Financial Derivative Instruments (FDIs) exposed to global equity indices and cash to gain this exposure. The Fund sells puts, triggered only at their maturity (typically 6 years). At outset, a defined return investment will only be eligible for inclusion if it provides for a long-term positive return in anything but the bleakest of market conditions. However, investors should be aware that capital is at risk and in the event of very poor equity market performance over a sustained period, it is possible that the Fund could generate negative returns. The use of FDIs means that the Fund will employ leverage.

The Fund may take a long exposure, meaning that it will invest directly, or take investment exposure via FDIs, in a security or securities (i.e. equities) with a view that their value will rise.

Market exposure is not expected to exceed three times the assets under management figure, however, there may be times during unexpected market volatility where this figure may be exceeded.

Intended retail investor: The Fund is not listed on an exchange and as such is intended for investors who understand the risks of investing in private funds and are willing to assume the potential for capital loss associated with investment in such companies including the loss of the total sum invested. The minimum investment per investor is the euro equivalent of US \$ 100,000. We have classified this product as 4 out of 7, which is an average risk class. The Fund has a long-term investment policy and is not intended for investors who will need access to their investment before the end of the recommended holding period of 3 years.

Maturity date: The Product has no maturity date. Causeway is not entitled to terminate the Product unilaterally. The Fund may not grow to or maintain an economically viable size, in which case its directors may determine to wind up the Fund at a time that may not be opportune for investors.

Depository: CACEIS Bank, Ireland Branch

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the fund. The risk and reward category shown is not guaranteed to remain unchanged and may change over time. The risk indicator assumes you keep the product for 3 years (where there is no exact maturity date). The actual risk can vary significantly if you cash in at an early stage.

The lowest category does not mean investment is 'risk free'. This indicator is not a measure of the risk that you may lose the amount you have invested.

We have classified this product as 4 out of 7, which is an average risk class.

This rates the potential losses from future performance at a medium, and poor market conditions could impact the capacity of the Fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

Investment EUR 10,000			
Scenarios		1 Year	3 Years (Recommended Holding Period)
Stress	What you might get back after costs	4,827	4,733
	Average Return Each Year	-51.73%	-22.07%
Unfavourable	What you might get back after costs	7,909	7,812
	Average Return Each Year	-20.91%	-7.90%
Moderate	What you might get back after costs	9,453	9,352
	Average Return Each Year	-5.47%	-2.21%
Favourable	What you might get back after costs	9,740	10,880
	Average Return Each Year	-2.60%	2.85%

This table shows the money you could get back over the next 3 years (recommended holding period), under different scenarios, assuming that you invest EUR 10,000. The scenarios shown illustrate how your investment could perform. This share class was launched on 31 January 2020 and the past performance of the Fund can be found in the Causeway Fund Literature section of the Manager's website <https://geminicapital.ie/causeway/>.

You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on proxies of similar products, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if the Manager is unable to pay out?

As a shareholder in the Fund, you would face a financial loss in the event of a default of the Fund. The sub-fund is not a guaranteed UCITS and as a result there is no guarantee scheme in place which provides a guaranteed rate of return.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest EUR 10 000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios EUR 10,000	If you cash in after 1 year	If you cash in at the end of the recommended holding period
Total costs	715	1,161
Impact on return (RIY) per year	7.15%	3.89%

Composition of Costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.

This table shows the impact on return per year			
One-Off Costs	Entry costs	5.00%	The impact of the costs you pay when entering your investment.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing Costs	Portfolio transaction costs	0.15%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	2.00%	The impact of the costs that we take each year for managing your investments.
Incidental Costs	Performance fees	0.00%	The impact of the performance fee. We take these from your investment if the product outperforms its high water mark, of (a) the highest previous net asset value per share of the series concerned at the end of a performance period; and (b) the initial issue price of the shares of that series.
	Carried interests	0.00%	The impact of carried interests. We do not charge carried interests to the Company.

How long should I hold it and can I take my money out early?

Recommended holding period: 3 years

The recommended holding period for the product is minimum of 3 years. The Fund's investment strategy is intended for long term investment and returns can be volatile. Investors may request the redemption of all or some of their shares on any Dealing Day (being the last business day of each month and/or such other or further day or days as may be determined by the Fund's directors in their discretion from time to time), subject to written notice being received by the Administrator (Caceis Investor Services Ireland Ltd.) not less than 20 business days prior to the relevant Dealing Day or such shorter notice period as the Fund directors may in their discretion determine generally or in respect of specific requests.
